

WILCOX 1000 Series

3 POINT CHISEL

Applications:

To loosen compacted areas as cost effectively as possible. This being not only lower draft requirement but producing the best possible finishes available. This fracturing and aerating increases water retention, improves leaching of salts out of root zone.

The unique Wilcox design shank combined with the Wilcox staggered concept was developed specifically with the advantages of a level relatively clod-free finish. These features were developed to broaden the benefits to the grower beyond just the chiseling operation.

Options:

- Rubber or steel gauge wheels
- Various points available (hardfaced, winged or chrome)
- Bolt on shank side guards
- Rear hitch

Features:

- 1/2" Heavy wall tubing
- Shear protection
- Alloy shank pocket and hitch assemblies
- State of the art welding techniques
- 1-1/4" x 33 alloy shanks
- Bolt on shank side guards
- Wilcox low draft shank designed to limit large clods
- Replaceable wear shins & points
- 3500 lb. hubs & spindles
- 3, 5, 7 shank models
- CAT II or III available

❖ HP REQUIRED:

20 - 50 hp per shank

❖ MAXIMUM DEPTH:

27" / 68 cm (with metric shank)

❖ OPTIMUM SPEED:

2 - 6 mph / 3.2 - 9.6 km/hr.
