

WILCOX CRUMBLERS

SPIRAL, STAR & HIGH TORQUE MODELS

Features:

- 34,000 lb. double spherical bearing
- Heavy duty debris shields to protect bearing seals
- Exclusive use of tapered fabricated beams for strength
- Spiral flighting coupled with larger diameter for smooth operation and improved rotation
- Fixed star teeth which provide significantly greater forces on clods
- Timed teeth for maximum single tooth pressure
- Simple bolt on teeth provide for easy replacement without disassembling entire roller. Customer need only purchase tooth sections not pipe or the cost of welding them together
- Through the optional down pressure kit, forces on clods can be doubled

Options:

- ✓ Down pressure kits
- ✓ 6-9-18 tooth star crumblers
- ✓ Pull type crumblers available

SPIRAL

Spiral crumbler ridges or checks field surface to improve pre-irrigation and crimps crop residue into soil

STAR

Star crumbler unsurpassed in breaking large dry clods

ADVANCED AG TILLAGE SOLUTIONS SINCE 1973
